	Communication plan & Next Steps

**Guiding Principles:**

Colorado Statewide Remedial Education policy values clear communication between the primary stakeholder groups, (1) students, (2) K-12 and higher education, (3) the public. The policy is informed by data, best practices and alignment with P-12, high school graduation guidelines, statewide admission standards, and transfer policy. For each of the stakeholder groups the policy is flexible and actionable to allow multiple pathways to educational success. The policy promotes a shared sense of responsibility and ownership among stakeholders.
